

D3050 HIGH EFFICIENCY DRYER

- 8Kg capacity
- Choice of five cycles
- Permanent press cycle
- Auto fluff cycles
- Auto dry cycles
- Reversible door
- Auto dry sensor

Technical Specification

| Width (mm) | Depth (mm) | Height (mm) | Weight (Kg) |
|------------|------------|-------------|-------------|
| 724 | 680 | 1092 | 57 |

Features

- 8kg capacity
- 3 temperature settings
- Choice of 5 cycles
Auto regular, timed regular, auto permanent press, timed permanent press - air fluff
- Auto dry cycles with end of cycle signal
- Permanent press cycle
- Reversible door
- High capacity fan and diagonal air flow
- 0.17 m³ drum
- Optional rear or left side vent
- Option - gas or electric heating

Benefit to Customer

- Will take full load from a Maytag or other 8kg washer
- Optimum setting for all fabric types
Regular, medium, delicate
- Maximum flexibility and efficiency
- Eliminates energy wastage, reduces ironing and finishing
- Incorporates cool down to eliminate thermal shock and minimise creasing to polycotton and other man-made fabrics
- Siting flexibility
- Faster, more efficient drying
- Improves air flow and tumbling action for superior finish
- Siting flexibility
- Gas approximately 1/6th of the running cost of equivalent electrically heated dryers (normal household tariff)
