SILC S/AAR FINISHING TABLE

Designed for fast and efficient ironing, the Silc S/AAR finishing table is simple to operate and ensures professional results with the minimum of staff training. Constructed to the highest standards with a stove-enamelled cabinet, this piece of equipment comes complete with a commercial steam iron with micro-switch steam control and a heated ironing board. A built-in vacuum cools garments for sharper creases and holds them to the table for better finishing. A steam generator is also built in to provide continuous steam operation.

Features

Benefit to Customer

High build quality with stove enamelled cabinet	Cleanliness and long life with robust reliable performance
Built-in boiler and powerful steam jet	Excellent results in a short space of time
Built-in vacuum	Cools garments for sharper creases and holds them to table for better finishing
Easy to operate	Professional finishing results with the minimum of staff training
Commercial steam iron with micro-switch steam control	Constant supply of steam - no need to top up with water
