

MAG UK expands overseas

Exporting laundry equipment is a growing part of the business conducted by MAG UK. For example, the company - in conjunction with the Kensington Drycleaning Group with whom MAG UK work very closely - recently exported to Sri Lanka, Columbia five fully reconditioned 22lb high-spin Ipson (micro 20) washing machines and five fully reconditioned 30lb gas heated ADC dryers, all of which operate via a central pay station at a recently opened laundry outlet.

Nathan Kumar, a partner at the Kensington Drycleaning

Group said the whole project went like clockwork and was managed in a very professional manner. All the sales and export arrangements were made by Georgina Dennis, partner at MAG UK.

MAG UK's Mark Dennis intimated that the company hopes to be supplying laundry equipment for a similar overseas project very soon.
