## Compact Dryers

The T30, 50 and 75 compact dryers superbly combine efficiency, economy and safety. Microprocessor controlled with LCD display for ease of programming and less user error, the dryers are the most efficient available saving up to 30% on gas over conventional models. Auto dry cycles prevent energy wastage and cut down on ironing and finishing.

### Features

- LCD display
- Microprocessor control
- Large lint drawer
- HSI ignition
- Large heavy duty door
- Slanting rib system in drum
- Cylinder
- Axial air flow system
- Reversing drum

### Benefits to customer

- Displaying individual cycles for ease of use - optimum programming, less user error.
- Simple one-touch operation with pre-programmed cycles. Tailor-made cycles can also be stored. 'Clean Lint Filter' prompt for maximum efficiency. Self-diagnostic error codes for easy fault finding. Auto dry cycles prevent energy wastage and cut down on ironing and finishing.
- More efficient drying, easy to clean.
- Fast Hot Surface Ignition reduces running costs.
- Robust steel door with gasketless glass and high density, tamper-resistant seal for safety and long life. Easy loading of bulky items.
- Prevents loads balling up by tumbling the load from the back of the basket to the front for the best drying results.
- Stainless steel drum for durability and hygiene.
- Giving maximum drying efficiency and fast results, reducing running costs over conventional air flow dryers.
- No tangling and more even drying for larger items.  
(Standard on T50 and T75. Optional extra on T30)

### SAFE - Sensor Activated Fire Extinguishing system

SAFE is a unique system specially designed to eliminate serious fires which start in tumble dryers. The Sensor Activated Fire Extinguishing system combats blazes which are often caused by spontaneous combustion or small loads that are over-dried.

SAFE is fast and efficient. When a fire starts in a dryer drum, two sensors detect the change in temperature and activate a sophisticated water vapour mechanism.

The vapour douses flames within seconds and the drum rotates, exposing and soaking all laundry to ensure that the fire is completely extinguished. The entire process takes just three minutes and if the fire restarts for any reason, the vapour mechanism reactivates. A great advantage of SAFE is that the risk of major damage to dryer and property and flooding to premises is eliminated.
